

# ES7 and ES8 Features

## Outro

Azat Mardan @azat\_co

# Tools

Use ES7 and ES8 with older browsers:

>> Babel

>> Traceur

>> TypeScript

# Babel Presets

>> es2015-loose

>> es2016

>> es2017

>> latest

>> react

>> stage-0, 1, 2, 3

<https://babeljs.io/docs/plugins/#presets>

ES8/ES2017 is still  
evolving

# Keep an eye on TC39 and proposals.

- >> TC39 process
- >> All proposals
- >> Finished proposals
- >> Mozilla Developer Network (examples, what browser supports what feature in what version)

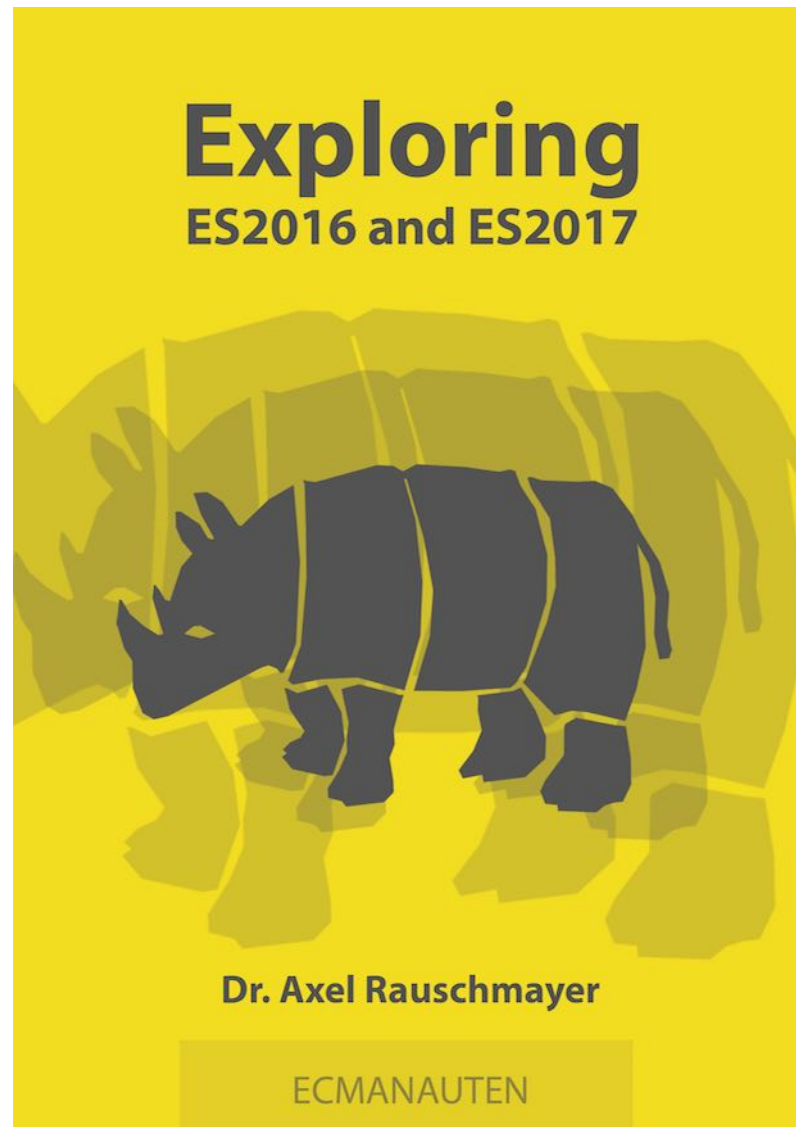

# Further Study

For a refresher on Promises, arrow functions, let/const and other ES6/ES2015 features, enroll into Node.University's ES6/ES2015 course.

# Top ES6 Features

Read for free online at  
[http://exploringjs.com/  
es2016-es2017/](http://exploringjs.com/es2016-es2017/)

ES.Next is a dynamic name that refers to whatever the next version is at time of writing.

ES.Next features are more correctly called proposals,  
because by definition the specification has not been  
finalized yet

# ES.Next

- >> <https://github.com/esnext/esnext>
- >> <http://kangax.github.io/compat-table/esnext>
- >> <http://esnextnews.com>

Now, go ahead and start *using* ES7  
and ES& to others!

The End 🏁
